Reason For Allowance

3. Claims 1-20 are allowed.

4. Following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1 and 11, which include (claim 1) the second optical configuration further comprising at least one spot displacement device, the second optical configuration adapted to receive as input an individual light beam reflected from the spatial light modulator, the second optical configuration further adapted to direct a light beam to the spatial light modulator; and the spatial light modulator, the spatial light modulator comprising at least one column, each the column comprising at least two rows, the spatial light modulator adapted to select a given path from the plurality of possible light paths for a light beam, wherein the spot displacement device is operable for shifting a light beam on the spatial light modulator by at least

one row; (claim 11) the first optical configuration further comprising at least one spot displacement device, the second optical configuration adapted to receive as input a individual light beam reflected from the spatial light modulator, the second optical configuration further adapted to direct a light beam to the spatial light modulator; and a the spatial light modulator, the spatial light modulator comprising at least one column, each the column comprising at least two rows, the spatial light modulator adapted to select a given path from the plurality of possible light paths for a individual light beam, wherein the spot displacement device is operable for shifting a light beam on the spatial light modulator by at least one row disclosed in the claims is not found in the prior art.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is consider pertinent to applicant's disclosure.

Collins, Jr (U.S. 6,525,889 B1) is cited show a device and method for producing optically-controlled incremental time delays in Fig. 8, however Collins et al. does not teach or suggest a the second optical configuration further comprising at least one spot displacement device, a spatial light modulator comprising at least one column, each the column comprising at least two rows, the spatial light modulator adapted to select a given path from the plurality of

possible light paths for a light beam, wherein the spot displacement device is operable for shifting a light beam on the spatial light modulator by at least one row.
